Foreword by Takuya Tasso, Governor of Iwate Prefecture

Chapter 1: Outline of Iwate Prefecture	1
Chapter 2: Outline of the Damage from the 2011 Disaster	4
Chapter 3: Great East Japan Earthquake and Tsunami Recovery Status	6
Chapter 4: Cases studies of Iwate’s efforts for disaster risk reduction and reconstruction	8
Section 1: Disaster Risk Reduction	10
1. Construction of a Disaster Risk Reduction System in Correspondence to Large-Scale Disasters	10
Initiative 1: Establishment of widespread disaster risk reduction facilities effective in supporting damaged areas during large-scale disasters	
Initiative 2: Construction of the acceptance and support system due to the widespread coordination between local public bodies	
Initiative 3: Construction of Iwate’s unique medical and welfare network	
Initiative 4: Standardization and sharing of disaster response operations in preparation for future disaster	
2. Preparation through Education and Culture	26
Initiative 5: Promoting disaster risk reduction education, and establishing disaster risk reduction systems in schools	
Initiative 6: Passing on lessons learned from the tsunami, and cultivating disaster risk reduction culture	
Section 2: Reconstruction	30
3. “Town Construction to Withstand Disasters” and “Ensuring Safety”	30
Initiative 7: Promoting town development based on a multi-layered disaster risk reduction system	
Initiative 8: Promoting radiation countermeasures with a focus on children’s health and food safety/quality assurance	
Initiative 9: Quick and efficient disposal of disaster debris	
4. Support for Rebuilding Survivors’ Lives	40
Initiative 10: Promotion of emotional care	
Initiative 11: Ensuring medical care in the affected areas	
Initiative 12: Improving administrative functions of municipalities	
Initiative 13: Maintenance and operation of survivors’ ledger system	
5. “Open Reconstruction” and “Reconstruction Deeply Rooted in the Region”	46
Initiative 14: Revitalizing the local community through cooperation between residents and various entities	
Initiative 15: Construction of sustainable local communities by promotion and utilization of local resources	
6. Protection of Cultural Properties and Protecting/Passing on Traditional Arts	52
Initiative 16: Promotion of reconstruction projects that respect cultural properties	
Initiative 17: Rebuilding local communities who have been active in preserving cultural properties	

Chapter 5: Proposals from Iwate Prefecture	54
Proposal 1 Establishment of institutional framework of disaster response support activities due to “horizontal supplement” from cooperation of local governments	
Proposal 2 Construction of collaboration and cooperation system between local governments and medical and welfare institutions	
Proposal 3 Completion, standardization, and sharing of disaster prevention business by the prefecture (regional autonomous body) for the promotion of disaster corresponding to the capacity of municipalities (basic autonomous body)	
Proposal 4 Promotion of regional collaboration-type disaster prevention education	
Proposal 5 Promotion of multiple disaster prevention-type town planning incorporating the concept of resilience (resilience, recovery)	
Proposal 6 Promotion of radiation impact measures focusing on ensuring the safety and security of children’s health and food	
Proposal 7 Quick and smooth processing of disaster waste	
Proposal 8 Construction of a basic disaster victim information sharing system for quick and smooth life reconstruction assistance for victims of disasters	
Proposal 9 Revival of local communities through cooperation with local residents and various organizational bodies	
Proposal 10 Construction of sustainable local communities through the utilization and development of local resources	
Proposal 11 Revival of local communities utilizing cultural assets, promotion of reconstruction projects paying attention to the protection of cultural assets, and promotion of protection of cultural assets during disasters	
Ganbaro Iwate!	67
